

The Coronavirus - a Root-Cause-Analysis

by Paul Dietl, Intelligence Analyst | 12. June 2021

The whole world will be dominated by the corona crisis in 2020 and for a long time afterwards. The resulting effects are fatal and range from economic disasters to rigorous restrictions on personal freedom and the loss of self-determination. We are fighting with the consequences of this virus without seriously questioning where it came from. Hardly anyone asks the crucial question about the cause, the so-called root-cause:

How does it come to this situation and where does the virus come from?

To work up or analyze a situation in order to derive measurements, you have to start at the bottom, with the so-called root cause. But nobody seems to be interested in it. It even appears that politics is purposely suppressing this question. But without a root cause it is not possible to take technically correct measurements in order to learn from this situation.

What happened? - The incidents relating to the virus outbreak

Let's begin at the bottom. At this what happened. At those facts which are perfectly clear regarding origin, outbreak, general conditions, incidents which correlate with the virus outbreak. This is a collection of incidents in conjunction with the outbreak and the spread of the virus and the happenings after:

- The initial virus outbreak was in China in the city of Wuhan.
- The outbreak just happened a few weeks before the chinese New Year festival. This is the time where travel activities of chinese people are at the highest level of the year.
- Millions of chinese people transported the virus all over the world. In occasion of the chinese Luna New Year.
- At the beginning the chinese government tried strictly to keep secret about the facts and the existence of the viurs. Until it was no longer possible.
- There were still rigorous travel activities of millions of chinese people after the publication of the coronavirus outbreak in Wuhan. The chinese government does not prevent the travel activities of their inhabitants. Even other countries like Austria still allowed chinese tourists to enter the country. There were no testings or medical checks at the immigration at the airport Vienna for chinese tourists. Purpose or just sloppiness of measurements?

- There are more than 50 kinds of corona viruses. Only 7 of these 50 are human pathogenic. From these 7 human pathogenic viruses only 3 are harmful to the human being (the other 4 only cause harmless infections). And all these 3 harmful human pathogenic viruses are coming from China.
- In Wuhan is one of the biggest and rare-existing bio-laboratory of bio safety level 4.
- This bio-laboratory of BSL 4 is one of the few in the world. It was built from China and France together. Shortly afterwards the Chinese quitted the cooperation with France, so China can follow their interests unimpeded.
- At the same time the anti-government demonstrations in Hongkong are at their peak which will be stemmed with the corona crisis. How practical.
- The world economy stuck in a crisis and is looking for ways out. A reset-button is highly desirable and could be realized in form of a pandemic.
- The boss of the World Economic Forum, Klaus Schwab, told by himself that the corona crisis is a big chance to reorganize the economic and social structure of the world.
- According to a US intelligence paper the chinese government has been knowing about the new illness in November 2019 or before.
- Even in November 2019 US intelligence services warned Israel of a new kind of corona virus coming from China. A memo of this subject was sent from the CIA to the Mossad. But this memo disappeared in a drawer, no measurements were taken.
- Chinese medical doctors and journalists who reported from the virus and its consequences have been arrested and silenced, their families have been threatened or arrested too.
- The WHO is not interested to clarify the backgrounds of the virus outbreak or to investigate the laboratory in Wuhan.
- On 21. January 2020 there was a phone call between Chinas president Xi Jinping and the general secretary of the World Health Organization WHO, Tedros Adhanom Ghebreyesus. In this call Xi allegedly harassed the WHO to delay the worldwide pandemic warning. German agents or one of their partner services listened in on this call. So the BND (german intelligence service) got knowledge of this. But the WHO denies the existence of this call.
- In 2017 and 2018 the WHO sold already testkits for Covid-19. Customers of these testkits were countries all over the world. This was also documented in the database of the World Integrated Trade Solution. The WHO denies a coherence with the 2020 Covid-19 outbreak. But the existence of these testkits was confirmed by the WHO. However, the WHO declares that the testkits were used for other purposes and can now (2020) also used for Covid-19 tests. A strange coincidence, isn't it? The entries in this database to these testkits has been changed in the meanwhile.
- The transfer of this virus occurs almost entirely by droplet infection. A smear infection is nearly impossible and extremely hardly occurs. Therefore, a human to human contact is mandatory

to transfer the virus, an indirect transfer is in general not possible. Consequently, the virus has the proper features for a spreading-test.

- An interesting fact is that there have been found traces of RNA-sequences of HI-viruses inside the Sars-CoV-2 virus. This is not a proof but a very strong clue that the virus has been manipulated.
- The chinese virologist Dr. Li-Meng Yan stated that the virus was produced artificially. Dr. Li-Meng Yan worked at the University of Hongkong and then escaped to the United States. Her current residence is secret. Several academic papers already prove this thesis. The government-controlled science community - ahead Christian Drosten - denies this thesis vehement but cannot present any counterevidence. An interesting detail is that you can hardly find these academic papers on Google, but very easily on Yandex.
- Only one year after the incident a WHO research team was allowed to investigate the root-cause of the virus. Thereby the team was allowed only to investigate those sites which were declassified by chinese authorities. The interesting places were still locked for the research team. But, what will you find one year after?
- In October 2019 the John Hopkins Center together with the Bill Gates Foundation conducted a pandemic-simulation-exercise named "Event 201". Content of this simulation-exercise was the pandemic spread of a new kind of corona virus. The John Hopkins Center does not deny the existence of this exercise but it denies a coherence with the current Covid-19-pandemia.
- Chinese investors were on shopping tour in Europe when the pandemia was on peak and many companies were economically weakened by pandemic measurements. Companies with high potential or technological know-how were bought very cheap by chinese investors. By this way China could buy technology for a cheap price.
- From 20. January to 11. March 2020 the chinese hacker group APT41 performed one of their biggest hacking campaigns ever. This was only possible because lots of IT-staff was working from home. Business applications were exposed a higher vulnerability risk because of homeoffice-work which does not provide an adequate protection level. Companies from 20 countries have been attacked, among them companies of financial system, government, health system, high technology, pharma companies, oil and gas. Preparing such huge hacking activities need weeks or even month for preparation. This allows the conclusion that the planning started long time before the 20. January 2020 and involved people already knew how the global situation would be in beginning 2020. The group APT41 is working very closely together with the chinese government.

This are the facts and they are irrefutable. These facts do not show a complete proof of the source of the virus or how it emerges but they are very strong evidences. When viewed all these single points together as a big picture there is the only one conclusion that this cannot be a coincident. An accumulation of so many coincidences is highly impossible.

There are further issues which are highly recommended as evidences:

- The behavior of this virus is very atypical, completely different to the other corona viruses. This is an additionally hint that the virus has been manipulated.
- The level of harm of this virus is - compared to other viruses - considered as minor. It is highly qualified to test the spread of a biological hazardous material.
- The time of the outbreak seems to be perfectly. It is this specific moment in time when the travel activity of Chinese people is at the peak, because of the upcoming Lunar New Year.
- Nobody is interested in the origin of the virus. It seems that the global player already knows the backgrounds.
- Statements according to the impacts of the virus are highly contradictory. Case counts do hardly have reliability. Official statistics are mis-stated by purpose. Important indexes to the disease are not made public or investigated.
- Statements of well-known virologists which does not meet government specifications are ignored or misrepresented.
- Statements and measures of governments are not evidence-based, rather controvert the proven facts.

It is quite interesting that in Vietnam which is next to China the case numbers from begin to the end of July 2020 are below 400, till spring 2021 not even reached the mark of 3000. How can it be that in some countries are so less case numbers and in others so many? Likewise death cases will be stated to be caused by Corona as comorbidity or not. In whole Europe this parameter has never been mentioned even it is a very important parameter. Why not?

Lets again take a look at the facts above. That all happen together would be a very big coincidence. And, the more facts come together in one coincidence the more impossible it is that it is really a coincidence. There is no need to be a big expert in intelligence analysis to see that there has been manipulated on a massive scale.

The whole situation in view of the visions of Xi Jinping

Let's go one step further and take a look at this root-cause-analysis in view of the aims and visions of Xi Jinping. This means, we simply put the facts of this root cause analysis above the following:

- On the 15. January 2017 Xi Jinping gives the opening speech to the World Economic Forum in Davos and thereby propagates the importance of international trade. Quote of Xi Jinping: "We will form a community of destiny and initiate the reform of the global governmental system."

- In China Xi declares that the communism is the only one truth. It should not only be implemented in China but rather be spread to the whole world. Xi is developing a model of society which the rest of the world is just beginning to decode. This model of society will become a threat for the global civilization. In 2018 Xi changed the constitution to be president for life like previously Mao. The goal is to implement this system of society worldwide.
- In the year 2013 a secret document has been leaked: The Document Nr. 9 of the year 2012. It is about an attack on the ideas of freedom. For Xi the free democracy is the enemy. In China he is conducting an ideological war against the western countries. We (outside China) do not recognize anything about this because news and information of this kind do not get through.
- A common program will be developed: The "Chinese Dream". The program contains that China will become the greatest economic and military power in the world till 2049. The program has been developed by Xi. A part of this program is the silk road project. Local markets outside China will be undermined in order to strengthen Chinas economy. Quote of Xi: "Whoever owns Europe owns the world". Thereby China influences the domestic politics of foreign countries (for example China pay bribes to foreign representatives). To extend the influence in Europe he maintains a network of china-friendly politicians.
- Two million members of the China's Communist Party infiltrate worldwide various political and economical institutions. They secretly represent the interests of China and the communist party.
- China takes advantages of the bad economical situation in Europe caused by corona crisis. They buy ailing companies in whole Europe for cheap price and strengthen their influence by this way.
- On 3. September 2015 Xi holds the biggest military parade which has ever taken place in China. And on 3. January 2018 Xi told to his soldiers during the new year speech: "The army has to increase training soldiers in all divisions and to prepare for war. Fighting spirit must be a duty. We must not fear any tests of characters or death." Like Mao before Xi strongly believes that all power comes out of barrels.
- For Xi Jinping western democracies are the bogeyman which in future shall be under chinese control. The monitoring of the population with modern surveillance technology should be transferred - like in China already exists - to other countries. Only by this way a system can be established which Xi wants.

If we set the root-cause-analysis and the aims of Xi Jinping in relation, a clear "cause and result" picture will be visible. It is just logical under these circumstances and backgrounds to trigger a pandemia with a virus to accelerate most of those goals. The 2. World War is many centuries ago and the signs of the times are again indicating a war since many years already. But a "new big war" does not fit to modern times. A big pandemia as a replacement for a 3. World War is basically plausible. But there is the question how is it possible that nearly (not all) the whole world is jumping on this trojan horse? The answer is simple: Two million chinese agents of the China's CP can move a lot, like it

shows. And the history of the recent years confirm this. Take a look at Sri Lanka, Portugal, Greece, and all those countries.

Conclusions

Now lets come to the next question: Cui bono? Who are the beneficiaries of this situation?

- The financial industry. It would be a reset button for them to provide a "restart" for the ailing financial situation which is in a dead-end-road situation since years.
- The governments who get an instrument into their hands offering the possibility to increase controlling of their population and restricting their doings. A virus pandemia operates like a catalyzer in such cases.
- And again the governements who are eager to abandon cash money to control and steer the financial flow. And with the corona crisis this is easier to do.
- The pharma industry, but not themselves rather the financiers in the background (like Bill Gates), which want to play on the top of the world economy because of making unprecedented profits.
- And again the pharma industry which want to increase their mRNA-technology further. Not the vaccinations which are just a side product. mRNA-technology can do much more than only vaccinations. Since 20 years already the pharma industry is researching mRNA-technology without having success. But now they have the opportunity to test this new technology on the whole world. Like said before, the main purpose of mRNA-technology is not the vaccination, there can be done really other things with this stuff (but that's another story).
- The World Economic Forum leaded by Klaus Schwab who highly desires a "Big Reset", according to this own words, he indeed appreciates this.
- Xi Jinping who by his own want to follow his interests. But the relationship between Xi Jinping and the World Economic Forum is not completely clear. However, it's on the dice that there is one.
- And again Xi Jinping, China and the communist party. China really takes strong advantages because of the worldwide corona measures. No matter if this is intelligence, data theft or just the acquisition of companies. For China the benefit of the corona crisis is enormous. Thereby China takes one big step closer to its goal the "Chinese Dream".

When all these single points are counted together there is only one possible conclusion (and these word are not of my own):

This virus was dispersed by purpose.

All those institutions and persons involved in this game have the motive, the resources and the opportunity to produce and spread a virus. To follow their goals and to implement their future plans. Plans which are lying long time in shelves and just wait to become reality. There happened already something similar on the world. It began around 1933.

This virus has been produced and released purposely. To give all those a powerful sword into the hands who have benefits from this. Many people would say that this sound like "conspiracy theory". That may be. But many years ago also the Pentagon Papers has been discounted as conspiracy theory to hide the doings of the administration. And as it turned out every word of the 6000 pages of the Pentagon Papers was the whole truth and nothing but the truth.
